Career Objective Survey Questions

DIRECTIONS:

Write a paper on your interest and achievement in a specific career. This paper should be typed and double spaced. All grammar, spelling, punctuation and content will be evaluated. The following questions must be answered in the composition. Any information from your research, experience and interests during the time spent in the lab during the cluster rotation, and that are important to you should also be included.

1. What is your career goal and why are you pursuing this area?
2. What abilities or aptitudes are needed for this career?
3. What further training does this job require, if any? (Further technical training, community college, 4-year college, certification, etc.?)
4. Describe working conditions and physical surroundings?
5. What is the job outlook in this area?
6. Are your personality and interests in line with career? Please briefly explain.
